

# Krypto500/1000

Professional Signals Analysis, Classification and Decoding

From COMINT Consulting LLC

Krypto 500 (left) and Krypto1000 (right), Analysis, Classification and Decoding products by COMINT Consulting, available from Mountain RF Sensors.

## WHAT HAVE YOU BEEN MISSING?

- Get more specifics on a signal than any other product
- Successfully decode in even the poorest conditions
- Always current - no outdated or out-of-use modes
- Precise automatic classification
- Intuitive and powerful user interface
- Run up to 32 modules simultaneously
- See more deeply into intercepts you capture with:
  - Better filters
  - Better demodulators
  - Special noise reduction techniques

## Krypto500

Narrowband signals decoding and analysis suite utilizing baseband audio.

## Krypto1000

Wideband signals decoding and analysis suite via receiver I/Q data.
